# 6. Function Inspection Criteria

### **6.1 Function definition:**

Camera module electrical performance and image quality.

### **6.2 Inspection methods**

- Staff: Visual inspection personnel need to be trained and have normal color recognition ability. Their vision should be above 1.0 (or more than 1.0 after correction is acceptable), and their color discrimination ability can pass standard tests.
- Tool: Connect the computer, inspect images with AMCap software.
- Distance and Time

Observation distance: 30~55cm

Observation time for each surface: 3~5seconds

 Inspection condition: Visual inspection should be performed under unobtrusive fluorescent lamps, and its minimum illumination should be above 100 feet of candlelight, or 60W fluorescent lamps, inspected at 1.5m distance.

### 6.3 Accept criteria

- The image has no mess, color screen and discoloration.
- There is no white spot, black spot, dirt or dark angle in the image.
- The image is same clear on all corners

# 7. Visual Inspection Criteria

### 7.1 The definition of the appearance

Camera module appearance.

### 7.2 Test methods

• Staff: Visual inspection personnel need to be trained and have normal color recognition ability. Their vision should be above 1.0 (or more than 1.0 after correction is acceptable), and their color discrimination ability can pass standard tests.

Distance and Time

Observation distance: 50~75cm.

Observation time for each surface: 3~5seconds

- Inspection condition: Visual inspection should be performed under unobtrusive fluorescent lamps, and its minimum illumination should be above 100 feet of candlelight, or 60W fluorescent lamps, inspected at 1.5m distance.
- Observation angle: Observation angle between  $40^{\circ} \sim 50^{\circ}$ .

### 7.3 Accept criteria

- Cleanliness: Parts must be free of stains, dust, grease, and other stains. Smudges due to transportation materials are acceptable if they can be blown away or wiped off.
- Assembly surface: The parts to be assembled should avoid scratches, gouges, dents, bends, cracks, indentations, abrasions or other defects caused by improper assembly.
