#### **EASY TO USE**

- Removable alignment insert for easy inspection and cleaning
- Field terminable
- Uses standard size 16 insertion/ extraction tools

#### **HIGH PERFORMANCE**

- Low loss
- PC and APC end face finishes for multimode and single mode applications
- Reduces overall system losses

#### **FLEXIBLE**

- Eight shell sizes for 2 to 32 fibers
- Range of shell materials and finishes to meet various application demands

#### **PROVEN PEDIGREE**

- Widely used termini in aerospace and military applications
- Meets ARINC 801.3 requirements
- MIL-DTL-38999 Series III-style shells
- Use widely available 38999 backshells and accessories

### **COMPATIBLE**

 Intermateable with competitive D38999 connectors using ARINC 801 contacts The MC801 connector combines the high performance of ARINC 801 optical termini with the convenience of a familiar D38999 Series III connector style.

The connector's threaded coupling and the termini's spring-loaded design make an excellent solution for high-vibration applications. The compact 1.25-mm ferrule provides a high-density solution—with up to 32 fibers in a size 25 shell.

The 38999-style connector offers scoop-proof mating, a wide selection of materials and finishes, six keying options, and compatibility with standard 38999 backshells and hardware.

Optical alignment is achieved with a thermoplastic insert containing precision zirconia alignment sleeves. Inserts, which are available for use with either the plug or receptacle, are removable to simplify cleaning. Stainless steel dowel pins also aid alignment during mating.

#### **MATERIALS**
